

DeFi Protocol Safety Report (Mar 2026)

Disclaimer: Basic risk tool using public data. Not financial advice or full audit.

AAVE 7.98/10 -> LOW RISK

Financial : 8.18/10 | Security: 8.26/10 | Operational: 7.50/10

Total = (Financial + Security + Operational) / 3

TVL : \$ 25.6B | Trend: Stable/Increasing

Utilization (Lending): 40.4% | Chains: 24

Data Source: Live API

Audited : Yes | Exploits: 0

Audit Note: V3.6 2025 (5 reports) - V4 2026 (Sherlock contest no findings, final audits) | Bounty: \$1.0M | Code Age: 567 days

Issues : 2023 vulnerability mitigated, no loss; 2025 periphery hack \$51K not core

UNISWAP 5.45/10 -> MEDIUM RISK

Financial : 0.97/10 | Security: 8.13/10 | Operational: 7.25/10

Total = (Financial + Security + Operational) / 3

TVL : \$ 3.2B | Trend: Stable/Increasing

Efficiency (DEX - Vol/TVL): 63.4% | Chains: 45

Data Source: Live API

Audited : Yes | Exploits: 0

Audit Note: V4 2024 (5+ in contest) - multiple firms, \$15.5M bug bounty active | Bounty: \$15.5M | Code Age: 152 days

Issues : No core exploits; Hook vulnerabilities noted in V4 audits pre-deployment; SIR 2025 exploit used V3 as a price oracle, which is not a Uniswap protocol vulnerability

COMPOUND 3.31/10 -> HIGH RISK

Financial : 1.11/10 | Security: 3.06/10 | Operational: 5.75/10

Total = (Financial + Security + Operational) / 3

TVL : \$ 1.5B | Trend: Stable/Increasing

Utilization (Lending): 27.7% | Chains: 10

Data Source: Live API

Audited : Yes | Exploits: 1

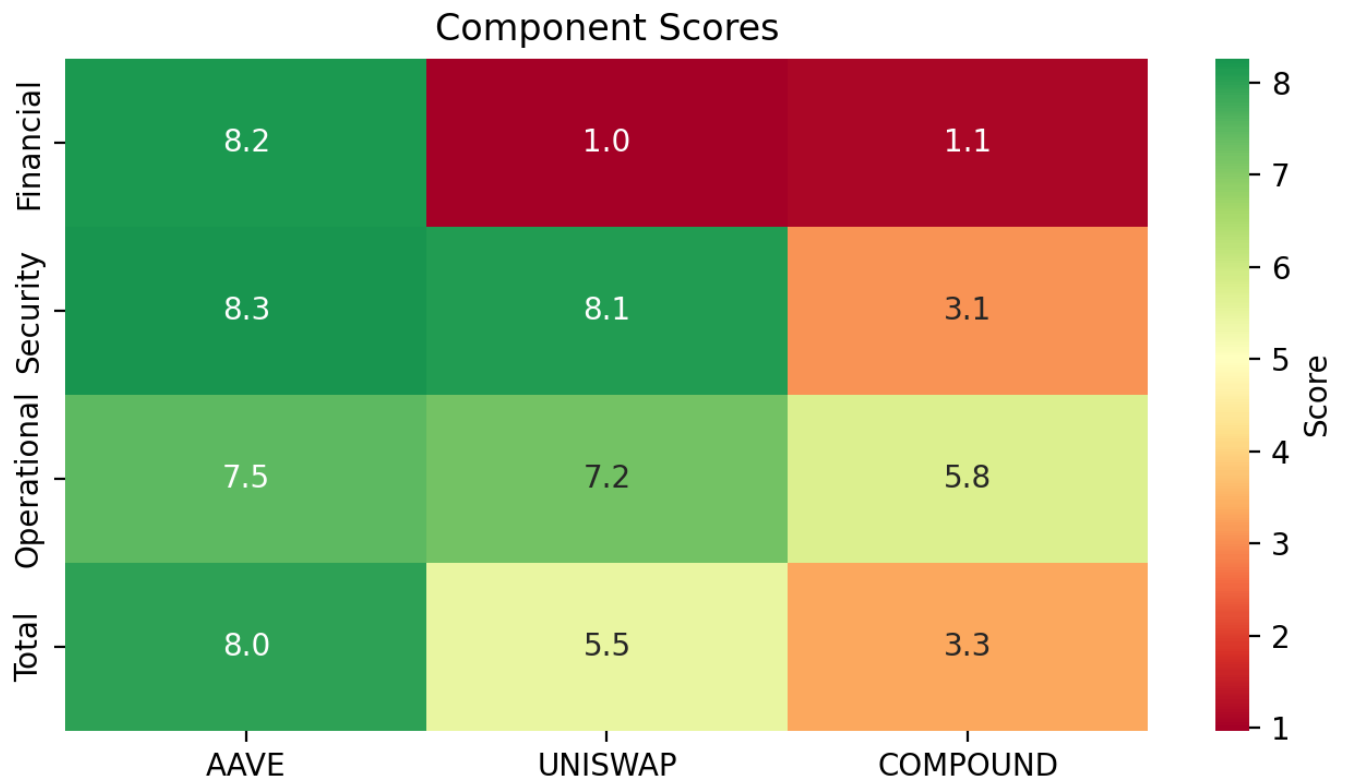

Audit Note: Pre-2023 (Trail of Bits, OpenZeppelin) - no recent audits found, \$1M bounty active | Bounty: \$1.0M | Code Age: 1386 days

Issues : No new 2023-2026 core exploits; 2021 distributor bug \$147M mitigated; Forks (Onyx, Sonne) remain vulnerable to the same pattern

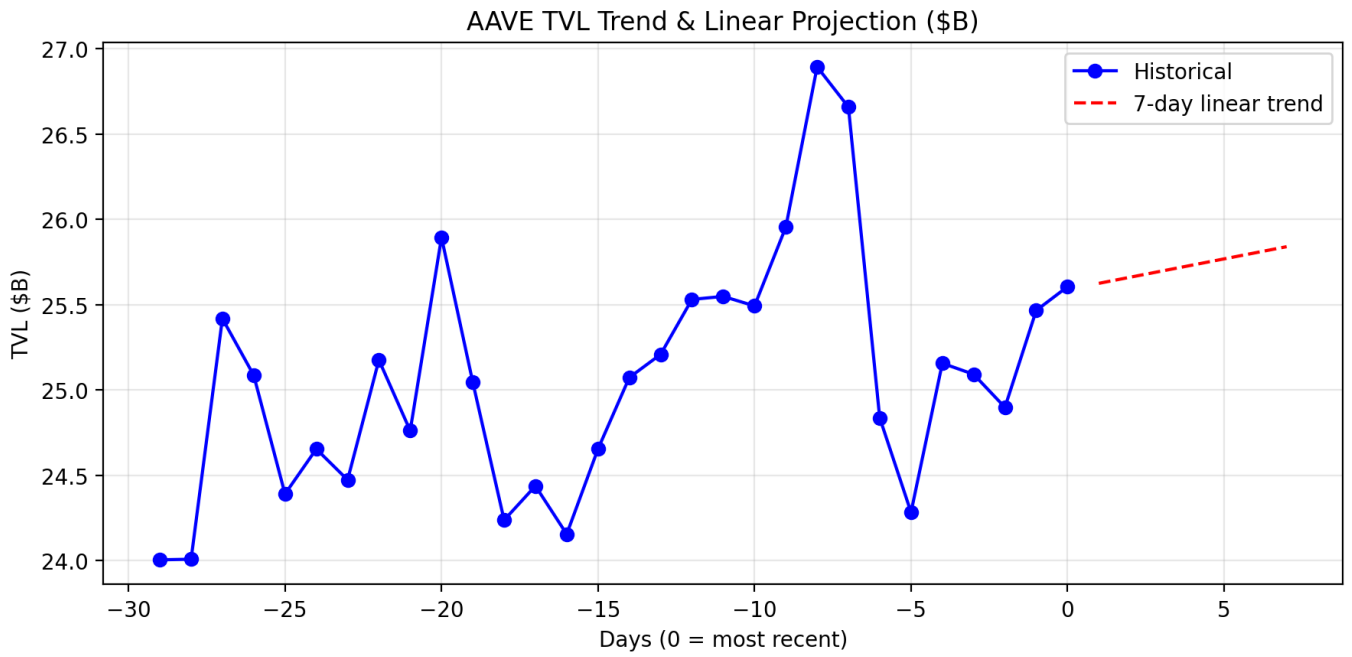

Overall Protocol Summary

Protocol	Total Score	Financial	Security	TVL(B)	Trend	Audit	Exploits
AAVE	7.98/10.00	8.18	8.26	\$25.6	Stable/Increasing	Yes	0
UNISWAP	5.45/10.00	0.97	8.13	\$3.2	Stable/Increasing	Yes	0
COMPOUND	3.31/10.00	1.11	3.06	\$1.5	Stable/Increasing	Yes	1
